Education

Indian Institute of Technology Jodhpur
B.Tech in Electrical Engineering

June 2018 – May 2022

Experience

Enrich Beauty - Software Development Engineer

*Nov 2022 - Present
Bangalore, India*

Revenue Management System

- Architecture **comprehensive revenue synchronization system** using **Firebase Functions**, processing invoices, credit notes, and orders across multiple business systems with real-time data consistency
- Built **multi-system data integration pipeline** synchronizing revenue data to **BigQuery**, store & employee revenue dashboard with **automated failure handling, retry mechanisms** achieving 99%+ synchronization accuracy
- Built **scalable scheduled job system** using **cursor-based pagination** for efficient large-scale data processing with comprehensive business logic validation

Vendor & Warehouse Management System

- Designed and Developed **vendor management system** with **vendor creation, product mapping, and trade terms management**, integrating with **BigQuery** for real-time data synchronization and **automated MRP updates** upon GRN creation via **Pub/Sub** messaging
- Architecture **end-to-end e-invoice/e-way bill solution** including **Webtel integration**, backend processing, and **Flutter dashboard UI** for generating compliant Excel files with **150+ validation fields, state codes, and GST calculations**, reducing warehouse team manual effort by more than 95%.
- Implemented **shipment tracking system** with **5-stage workflow**, including **picker assignment API** and developed complete **Flutter UI** for warehouse staff to pick and scan shipments

Fortune Wheel Rewards System

- Developed **interactive fortune wheel system** using **Flutter and Firebase Functions backend**, implementing **dual-wheel configuration** with location-based wheel and reward configuration
- Built **custom reward distribution algorithm** with weighted probability calculations and concurrent request handling using Firestore transactions, ensuring data integrity and preventing race conditions during high-traffic
- Integrated **reward management** with daily tracking, special reward constraints, and automated reward processing and points crediting, resulting in **1.5x target engagement and 5% increase in average order value**

Retail App Homepage

- Led development of **Flexible Slot system** using **Flutter** with 5+ widget types (carousel, horizontal list, vertical list, grid, column) and **Firebase Remote Config** integration, enabling real-time content updates and seamless backend synchronization supporting dynamic content management
- Architecture **in-house serialization/de-serialization system** with **ISAR database integration**, optimizing homepage data retrieval from Firestore and reducing API calls by 80% through caching mechanisms

Reliance Jio Platform - Software Development Engineer

*July 2022 - Oct 2022
Mumbai, India*

Jio Health Team

- Worked on JioHealth team and developed scalable microservice integrations in **Java/Spring Boot** using **Redis Sentinels** and **Azure Service Bus**, improving the performance of WhatsApp bots.

Technical Skills

Languages: Typescript, Dart, Java, C++, SQL, HTML, CSS

Libraries and Frameworks: Flutter, Node.js, Express.js, Spring Boot, React.js

Tools and Databases: Firebase, GCP, Firestore, Meilisearch, BigQuery, MongoDB, PostgreSQL, Redis, Agile, Git

Achievements

- Won Taking Ownership and Outstanding Delivery at Enrich for Successfully developing 5+ high impact projects.
- Student Guide at Counselling Service (IIT Jodhpur) – Guided and mentored 8 freshmen in their freshman year.
